Contract Length: 1 year
Language: English

Statement Of Work

Objective

Transport Canada (TC) requires a senior PKI specialist to complete the technical requirements to develop a dedicated PKI solution Request For Proposal (RFP), to prepare evaluation criteria to score proposals and to participate in the evaluation of proposals.

The senior level resource must also provide advice and recommendation during the all processes.

Scope of Work

Transport Canada is seeking a senior level resource to:

- Assess the preliminary list of 58 Public key Infrastructure requirements for completeness and provide recommendations on adding or subtracting requirements. - Complete the final list of technical requirements for the PKI solution.
- Develop evaluation criteria and scoring for each of the requirements mentioned in the final list.
- Provide advice and recommendation to TC during the process.

Reports and Deliverables

- Assessment of the preliminary list to be performed in consultation with TC and provide a final list with rationale/explanation within 3 days after the contract is issued.
- Development of evaluation criteria and scoring for each of the requirements in the final list to be provided in table format within 6 days after the contract is issued.
- As part of the evaluation team, evaluation of all received proposals compared to the list of criteria and scoring of proposals to be provided in writing within 7 days after reception of the proposals.

Acceptance Criteria

All reports, deliverable items, documents, goods and all services rendered under the Contract are subject to inspection by the Project Authority. Should any report, document, good or service not be in accordance with the requirements of the Statement of Work and to the satisfaction of the Project Authority, as submitted, the Project Authority will have the right to reject it or require its correction at the sole expense of the Contractor before the Project Authority will recommend payment.

Security Requirement

No security status is required pursuant to the Government of Canada Policy on Government Security. The contractor will not be given access to any personal or confidential information pursuant to this contract.

Government Furnished Support/Equipment/Information

The contractor must take reasonable and proper care of all Government Property while it is in its possession or subject to its control. The contractor is responsible for any loss or damage resulting from its failure to do so other than loss or damage caused by ordinary wear and tear.

Mandatory Criteria

ID	Mandatory Technical Criteria	Met / Not Met	Cross Reference with Bid Substantiating Detail
MT 1	The Bidder must demonstrate that the proposed resource meets the overall requirements of the resource Category - Public Key Infrastructure Specialist (PKI), Senior Level, as determined using the Flexible Grid.		
MT 2	The bidder must demonstrate experience reviewing existing PKI policies, standards, guidelines and procedures and provide advice as to their appropriateness and effectiveness.		
MT 3	The bidder must demonstrate experience in the design of PKI related frameworks and implement the PKI infrastructures required to protect assets and to support application systems.		
MT 4	The bidder must demonstrate experience providing advice on PKI aspects of application systems under development		

Point Rated Criteria

Public Key Infrastructure Specialist (PKI) Flexible Grid
